PRINTABLE CHECKLIST

Vastu checklist: the centre of your flat

Use this when you mark the Brahmasthan on a plan, or when you view a flat and want to see what actually sits at its centre. The corners decide the shape, the dot decides the centre.

- [ ] **1. Outer wall line marked**
  Take the flat as built and sold, and keep the same boundary for the whole exercise.
- [ ] **2. Centre dot marked**
  Draw both diagonals of the outline corner to corner; where they cross is the centre.
- [ ] **3. L or U shape completed**
  Fill the missing arm to a rectangle on paper before drawing the diagonals.
- [ ] **4. Cut corner noted**
  A cut north-east corner is a Major Defect; a cut south-west corner is a Major Defect too.
- [ ] **5. Centre kept open**
  The Brahmasthan should be open, with no furniture parked on the middle of the flat.
- [ ] **6. Centre kept clutter-free**
  Nothing stored at the centre, no cartons and no stacked weight.
- [ ] **7. Centre well lit**
  Light reaches the centre of the plan.
- [ ] **8. Room at the dot named**
  Note whether the dot falls on open floor, in a passage, or in a room, and which room.
- [ ] **9. No toilet or kitchen at the centre**
  A toilet, kitchen, staircase, storeroom or water tank at the centre is Problematic (Major Defect).
- [ ] **10. No wall or pillar on the dot**
  A wall, pillar or heavy structure at the centre is a Major Defect.
