VastuScan

PRINTABLE CHECKLIST

Vastu checks for a rented flat

Use before signing a lease and again on moving day. Critical defects are the ones no remedy fixes, so check them first.

- [ ] **1. Main door's direction and pada**
  Stand at the centre with a phone compass. A main door in the south-west is a Critical defect in our rules.
- [ ] **2. Toilet in the north-east**
  Check every toilet's zone. A toilet in the north-east is a Critical defect; no remedy fixes it.
- [ ] **3. Kitchen in the north-east**
  Fire in the water zone. A kitchen in the north-east is a Critical defect; no remedy fixes it.
- [ ] **4. Staircase in the north-east or centre**
  Check where the stairs fall. Both are Critical defects; the centre one blocks the core energy of the home.
- [ ] **5. Toilet above or below a puja room or kitchen**
  In a multi-storey building, ask what sits above and below. Both are Critical defects.
- [ ] **6. Master bedroom**
  Belongs in the south-west. The north-east and south-east are Major defects for it.
- [ ] **7. Sleeping direction**
  Head to the south or east, headboard against the south or west wall, bed in the south-west corner of the room.
- [ ] **8. Work desk**
  Face east or north while working. Facing south is linked to stress and obstacles.
- [ ] **9. Mirror**
  North or east wall. Never facing the bed or the main door.
- [ ] **10. Locker or safe**
  South wall, opening north. Not in the north-east or south-east, not visible from the entrance, not under a beam.
- [ ] **11. Toilet in the north**
  A Major defect, not trivial: aluminium or blue strip, a permanently closed door and rock salt. Low-cost, never no-cost.

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
