VastuScan

PRINTABLE CHECKLIST

Vastu checklist for your home office

Use this to check your office against the Vastu rules for its room, desk and cash. The room's zone, your desk and where the safe sits decide most of it.

- [ ] **1. Office room's zone**
  West, south-west or south are Ideal for a home office; north and north-west are Acceptable; north-east and south-east are Problematic.
- [ ] **2. Facing at the desk**
  Face east for creative or knowledge work, north for financial and business work. Avoid facing south, and avoid west for long hours.
- [ ] **3. Beam over the desk**
  The desk should not sit directly under a beam. Move the desk clear of it.
- [ ] **4. Wall behind your back**
  Sit with a solid wall behind you. Never sit with your back to a door or window.
- [ ] **5. Video call background**
  On video calls, a south or west wall behind you symbolises strength and authority.
- [ ] **6. Where the safe stands**
  Ideal on the south wall of a room, opening north. A west wall opening east or north is Acceptable. Avoid north-east and south-east.
- [ ] **7. How the safe sits**
  Keep it heavy and on the floor or a sturdy surface, never hanging or elevated, and never under a beam.
- [ ] **8. Safe's visibility**
  Not visible from the main entrance, and not in the bedroom where you sleep. Dark colours are considered best.
- [ ] **9. Desk equipment**
  Laptop and phone in the south-east of the desk; printer west or north-west; dustbin south or south-west; water bottle north-east.
- [ ] **10. Light at the desk**
  Some natural light should reach the workspace. Avoid sitting under artificial light only.
- [ ] **11. Clutter and plants**
  Keep the desk clear, since clutter is mental clutter. A money plant or jade plant on the north side of the desk.

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
