PRINTABLE CHECKLIST

Vastu checklist for a stuck career

Use this when effort is going in and results are not coming. Check the north zone, the work corner and the main door; the worst placement decides what to fix first.

- [ ] **1. Desk facing east or north**
  Sit at the desk with a phone compass: east for creative or knowledge work, north for financial or business work.
- [ ] **2. Solid wall behind your back**
  The chair's back should be to a solid wall, never to a door or a window.
- [ ] **3. Desk not under a beam**
  Look up: the desk and chair should not sit directly beneath an exposed beam.
- [ ] **4. Work corner in an Ideal zone**
  West, south-west or south is Ideal; north and north-west Acceptable; north-east and south-east Problematic.
- [ ] **5. North zone clear**
  Note what occupies north — work corner, toilet, kitchen, storeroom or water tank — because north is the career zone.
- [ ] **6. Main door opens inward**
  From outside, the door should swing inward and clockwise and be the largest door in the house.
- [ ] **7. Door solid and sound**
  Solid wood, two panels preferred; no creaks, cracks, dents or peeling paint — oil a creaking door at once.
- [ ] **8. Entrance well-lit**
  The entrance area should be lit at all times; a dark entrance is what Vastu warns against.
- [ ] **9. Nothing blocking the entrance**
  No shoe rack in front, no dustbin in view, no mirror facing the door, no fountain in front, no thorny plants, no broken items.
- [ ] **10. Toilet door not seen from the entrance**
  If the toilet door is visible from the main entrance, keep it closed at all times.
- [ ] **11. Centre of the home**
  A toilet, kitchen, staircase, storeroom or water tank at the centre is a Major Defect; the centre should be open, clutter-free and well-lit.

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
