PRINTABLE CHECKLIST

Vastu checklist for debts not clearing

Use this standing at the centre of your home with a phone compass. The main door's pada and the north zone decide most of what a debt check finds.

- [ ] **1. North zone kept open**
  In Vastu Shastra the north is governed by Kubera, for prosperity and financial growth. Walk the band and see what is stored on it.
- [ ] **2. Storeroom in the north**
  Our rules list a storeroom in the north as a minor defect: noted, not a deal-breaker. Move stored goods off the north band where you can.
- [ ] **3. Main door pada found**
  Stand at the centre and take the bearing of the main door. The 32 padas are 11.25° arcs around the centre, so a few degrees decide it.
- [ ] **4. S4 (Grihakshata) checked**
  168.75° to 180° is S4 Grihakshata, Ideal, traditionally associated with productive output from work undertaken.
- [ ] **5. S5 (Yama) checked**
  180° to 191.25° is S5 Yama, Problematic, traditionally associated with accumulating debt and with the mind becoming blocked.
- [ ] **6. South-west padas checked**
  S8 (Mriga) and W1 (Pitra), both in the south-west, are Critical defects. Our rules recommend no remedy for them.
- [ ] **7. Locker on the south wall**
  The safe belongs on the south wall of its room, opening north, Kubera's direction. The west wall, opening east or north, is acceptable.
- [ ] **8. Locker not in the north-east or south-east**
  The north-east is not for material wealth storage. The south-east is the fire zone that can burn wealth.
- [ ] **9. Locker heavy, on the floor, not under a beam**
  Keep the safe heavy and on the floor or a sturdy surface, never hanging or elevated, and never under a beam.
- [ ] **10. Locker out of sight of the entrance**
  Stand at the front door: the safe should not be visible from it. Keep it out of the bedroom where you sleep.
- [ ] **11. Mirror facing the safe**
  Our rules place a mirror facing the safe, which symbolises doubling of wealth.
- [ ] **12. North-east corner checked**
  A toilet or a kitchen in the north-east is a Critical defect in our rules, and no remedy is recommended.

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
