PRINTABLE CHECKLIST

Vastu checklist: when a marriage is getting delayed

Use this to check the room of the son or daughter waiting to marry. Work from the centre of the home with a phone compass; the room's zone decides the finding.

- [ ] **1. Centre of the home marked**
  Every direction is read from the Brahmasthan, the centre of the home.
- [ ] **2. Zone of each bedroom noted**
  Stand at the centre with a phone compass flat in your hand; north fixes the other seven zones.
- [ ] **3. Son or daughter sleeps in the north-west**
  The north-west (Vayavya), the zone of movement, is kept by Vastu Shastra for unmarried daughters. Ideal for this room; west and north are Ideal too.
- [ ] **4. Son or daughter not in the south-west**
  The south-west is for the head of the household only; for this room it is Problematic. Swap with the parents' room.
- [ ] **5. Parents in the south-west**
  The master bedroom is Ideal in the south-west, the settled zone of the head of the household.
- [ ] **6. Head of the bed to the east or south**
  Never north.
- [ ] **7. Bed not under a beam**
  Move the bed so no beam runs directly over it.
- [ ] **8. Mirror not facing the bed**
  A dressing table belongs on the north or east wall.
- [ ] **9. No water feature in the room**
  Aquariums and fountains do not belong in a bedroom.
- [ ] **10. North-west room in light colours**
  White, grey, cream or light green. Avoid red, orange and dark colours there.

NOTES

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
