PRINTABLE CHECKLIST

Vastu checklist: the north zone and your safe

Use this when money seems to leave faster than it arrives. Check the north band of your home and where your safe sits, the two placements Vastu tradition links most directly to money.

- [ ] **1. Safe on the south wall**
  Ideal: door opening north, Kubera's direction, where wealth is said to flow toward you. Stand in the room and check both.
- [ ] **2. Safe on the west wall**
  Acceptable when its door opens east or north.
- [ ] **3. Safe not in the north-east or south-east**
  The north-east is not for storing material wealth; the south-east's fire zone is said to burn wealth.
- [ ] **4. Safe out of the bedroom**
  It should not be in the room where you sleep; use a separate room or a study.
- [ ] **5. Safe heavy, on the floor**
  Never hanging or elevated; it should sit on the floor or a sturdy surface.
- [ ] **6. Safe not visible from the entrance**
  Stand at the main entrance and look. The safe should not be visible from there.
- [ ] **7. No beam above the safe**
  Never place a safe under a beam: a beam is read as pressure on wealth.
- [ ] **8. Space around the safe clean**
  Keep the area around the safe clean and uncluttered.
- [ ] **9. No toilet in the north**
  Our rules grade it Problematic. The remedy is an aluminium or blue strip, a permanently closed door and rock salt.
- [ ] **10. No toilet in the north-east**
  A Critical defect. Our rules recommend no remedy short of moving the structure or the room's use.

NOTES

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
