PRINTABLE CHECKLIST

Vastu checklist for your work corner at home

Use this to check the corner where you work at home: the direction you face, what sits behind you, and where the room sits in the home. The direction and the wall behind you decide most of it.

- [ ] **1. Face east or north while working**
  East suits creative and knowledge work; north suits financial and business work. Tradition advises against facing south, and against facing west for prolonged work.
- [ ] **2. Sit with a solid wall behind your back**
  A solid wall gives support. Never sit with your back to a door or a window.
- [ ] **3. Move the desk out from under any beam**
  The desk should not sit directly under a beam.
- [ ] **4. Place the work room in the right zone**
  West, south-west and south are ideal; north and north-west are acceptable; north-east and south-east are Problematic.
- [ ] **5. Put the laptop at the south-east corner of the desk**
  Tradition places the computer, and the phone and its charging point, at the south-east, the fire zone.
- [ ] **6. Keep a water bottle at the north-east of the desk**
  The water bottle goes at the north-east of the desk.
- [ ] **7. Put a green plant on the north side of the desk**
  A money plant or jade plant on the north side of the desk promotes growth.
- [ ] **8. Set the printer to the west or north-west**
  West or north-west is the placement given for the printer.
- [ ] **9. Keep the dustbin to the south or south-west of the room**
  South or south-west is the placement given for the dustbin.
- [ ] **10. Let daylight reach the desk**
  Natural light from the east is ideal for alertness; avoid working only under artificial light.
- [ ] **11. Check the wall behind you on video calls**
  A south or west wall behind you on camera symbolises strength and authority.
- [ ] **12. Clear the desk surface**
  Clutter on the desk is read as mental clutter.

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
