VastuScan

PRINTABLE CHECKLIST

Vastu walk-through for your own home

Use this when a home feels heavy or unsettled. Walk it once, centre first, and note what sits in each zone. Each line gives the Vastu rule behind it.

- [ ] **1. Centre of the home**
  Keep it open, clutter-free and well-lit. A toilet, kitchen, storeroom or water tank there is a Major Defect; so is a wall, pillar or heavy structure.
- [ ] **2. North-east corner**
  Keep it open, not cut or missing. A toilet, kitchen or staircase there is a Critical defect. A cut or missing corner is a Major Defect.
- [ ] **3. Overhead water tank**
  In the north-east or south-east it is a Major Defect.
- [ ] **4. Main door direction**
  A main door in the south-west is a Critical defect. In the south it is a Major Defect only with a non-auspicious pada.
- [ ] **5. Main door condition**
  The largest door in the house, opening inward, without creaks, cracks or peeling paint.
- [ ] **6. Entrance**
  Well-lit at all times. No shoe rack directly in front of the door, no dustbin visible, no mirror facing the door.
- [ ] **7. Dustbins**
  Keep every bin covered and out of view of the main entrance. The kitchen bin belongs in the south-west corner of the kitchen.
- [ ] **8. Brooms and cleaning supplies**
  Store in the west or north-west, never in view of the entrance. Replace broken or worn brooms.
- [ ] **9. Bathroom door and lid**
  Keep the bathroom door closed when not in use and the toilet lid closed. Keep the room well-lit.
- [ ] **10. Toilet above or below a puja room or kitchen**
  In a multi-storey home this is a Critical defect. No remedy; only moving the room or its use changes it.

NOTES
