PRINTABLE CHECKLIST

Toilet and bathroom Vastu checklist

For checking a home’s toilets on a plan or a site visit. Read each toilet’s direction from the centre of the home, and check every floor above and below.

- [ ] **1. Each toilet’s direction from the centre noted**
  North-west is Ideal. West, west-north-west, north-north-west, south-south-west and east-south-east are Acceptable.
- [ ] **2. No toilet in the north-east**
  A north-east toilet is Critical: only moving it changes the grade.
- [ ] **3. No toilet above or below a puja room or kitchen**
  Either is Critical. Ask what sits in the same spot on the floors above and below.
- [ ] **4. No toilet stacked over or under a bedroom**
  Especially the master bedroom.
- [ ] **5. Toilet door doesn’t face the main door or the kitchen door**
  Check both from inside the home.
- [ ] **6. WC in the west or north-west of the bathroom**
  Seated facing north or south, never east or west.
- [ ] **7. WC not visible when the bathroom door opens**
  A partition or an L-shaped layout solves it.
- [ ] **8. Basin in the north, east or north-east**
  Shower in the south-west or west; geyser in the south-east.
- [ ] **9. Floor slopes to a north, east or north-east drain**
  Window or exhaust on the east or north wall.
- [ ] **10. Light colours and good light**
  White, cream, light blue or light green; avoid dark colours.

NOTES

Grades follow VastuScan's published Vastu rules. Vastu is traditional guidance; use it alongside a proper inspection.
